Optimizing oral health in the community setting

Establish VDH

Access ➔ Educate ➔ Prevent ➔ Relationship building

Caries present?

Can only the dentist treat?

SDF or ITR contraindicated?

Cost ➔ Urgency ➔ Transportation

ID and mitigate barriers

Assist to clinic

Traditional restorations not feasible due to barriers

• Multiple carious lesions prior to definitive care
• High caries risk
• Poor home care

SDF or ITR

Fluoride, sealants, risk-based recare

Special thanks to Talbot Fucci, DMD, for contributing this visual model for the SMILES Dental Project
